

Winners of Innovation Incubator Hackathon @ Amrita Vishwa Vidyapeetham, Bengaluru, 28th April, 2022

Amrita Vishwa Vidyapeetham is one of the most buoyant centers of research, education and technological advancement, in the tech-city, Bengaluru. Innovation Incubator group of companies, headquartered at New York USA with employees in various states of USA and India, offers the AI entrepreneurs launch pad.

Amrita Vishwa Vidyapeetham, in partnership with Innovation Incubator, is pleased to announce the top six winners of the first ever one week Artificial Intelligence Hackathon in its Bengaluru campus from more than 14 teams comprising of 60 students in the Artificial Intelligence, Computer Science and Engineering, MTech and MBA. Geekolution focused on healthcare doctor note summarization led by Anwar Nadaf, Bhushan Jawre, Sushmitha R, E.Vaan Amuthu and Vishvesh Pathak won the first prize followed by The Tech Raiders and Indumati Innovators.

Students participated in the hackathon from April 20th - April 27th to solve real AI problems in Healthcare, Real estate, Agriculture, Fashion and Automotive sectors. They were guided by Innovation Incubator AI, tech and industry experts during the hackathon. The winning teams are The Tech Raiders - Srigiri Sruthi, Shubham Garg, Abhiram; Indumati Innovators - Keshav Rathinavel, Hemanth Bysani, Harsh Singh, Anshuman Sahoo, Sharan; Fashion Ciphers - Savarala Chethana, Kunisetty Jaswanth, Thatavarthi Giri Sougandh, Sai Snehith k; Innovators - G Sarayu Varma, Hima Varshini, Vemula Srihitha and Land Mafia - Pranav Ramachandrula, S Sruthi, Jayana Abhigna Sree.

"A common lament of current times is the industry-academic gap. Hackathons have proven to be an effective way of bridging this gap, while at the same time offering excitement, learning, and upskilling all at the same time. This has also become a great way for the industry to identify talent directly and closely suited to their needs. I am sure that the current hackathon event will prove to be of immense value simultaneously to our students, to Amrita School of Engineering, Bengaluru, and to IIC." - says Dr. Sriram Devanathan, Principal of Amrita School of Engineering, Amrita Vishwa Vidyapeetham, Bengaluru.

While the experience working with tech experts itself was a reward for all participants, there were other rewards waiting for the first 6 winning team members. This includes cash awards and internship opportunities to work on real projects in Innovation Incubator and it's incubated startups.

"We are excited to partner with Amrita Vishwa Vidyapeetham to organize and run this industry focused hackathon. The collaboration with Amrita is the next chapter of our FutureTalent program", said Sreekar Pai, Vice President, Innovation Incubator Advisory Pvt Ltd.

"We have made a difference in the lives of more than 900 fresh graduates in India and abroad for the past seven years. The program has hands-on training, peer programming and in-person mentorships to create a truly unique value proposition for the students and the universities we partner with."

Innovation Incubator FutureTalent program has enabled hundreds of students and graduates to start-off at the right step, with the right resources to make them industry ready. The FutureTalent program has impacted in a big way to our group, portfolio companies, key clients and partners by attracting the right talent, building them, transforming them to be productive and resourceful. The Future Talent program has been running an industry ready, hands-on curriculum which acts as an extension of their academics and builds the students with the right skill sets, mindset for the job requirements of the market. The program has special focus on upcoming skills in AI/ML, Metaverse, Blockchain, Full Stack Software Engineering, Quality Assurance, Product Management, DevOps and UX Design.
